ICS PROJECT — INTEGRATED CULTURAL STUDIES:  
PRELIMINARY CONSIDERATIONS

S u m m a r y

In the article, I discuss theoretical problems of Polish Cultural Studies regarding methodology, methods of data collection and procedures of hypothesis formulation. I propose to undertake a discussion of possibilities for its integration. Establishing the framework for Integrated Cultural Studies Project (ICS Project) could result in comprehensible methodology. The well-structured methodological approach towards cognition of cultural phenomena would eliminate freedom of cognition that leads towards eclecticism. Furthermore, ICS Project theoretically would allow the rational formulation premises together with the elimination of latitude approach towards issues of cognition.
